

POINT OF SALES SYSTEMS DEALERS

Issued: May 2021

The Ministry of Finance requires retailers to submit sales electronically. Several point of sale (POS) systems have been certified for electronic reporting by the Ministry of Finance.

Retailers must ensure the system selected, installed and configured is the most current version of the certified POS software and must ensure that their system meets the reporting standards required for their market area.

To select and acquire an approved POS system, retailers may contact any of the following dealers. Once a system is selected, retailers are encouraged to contact the Ministry of Finance to ensure it meets current reporting standards.
